Lawrence Richardson

US EPA Region 3

Cost Recovery Branch

Re: Lower Darby Creek Road Site and Clearview Landfill dumping operations

On 3-15-2010 at 1:45PM, EPA, Civil Investigator Lawrence H Richardson conducted an interview with Mr. David Smalls Jr. via phone conversation regarding the Lower Darby Creek Site.

Mr. Smalls confirmed that he is the son of the late David Smalls Sr. (deceased). Mr. Smalls acknowledged that his father was the president of the Hedgerow Residence Association which represented the residence who lived in the Eastwick area of South West Philadelphia. Mr. Small stated that his parents move into a new housing development. Smalls stated that at the time the new home buyers were unaware of that the development was built very near to the Clearview landfill. The housing developer was Korman Corporation.

Mr. Smalls stated that he has no knowledge of the Clearview operation or activities. Stated that it was common knowledge that dumping occurred at that location. Smalls stated that the situation worsened as a result of hurricane Floyd. The hurricane caused flooding which cause heavy water damage in his development. Mr. Davis stated that his father and the residence were deeply concerned about the flood waters which ran onto their properties from the Clearview dump. He stated that neither he nor his father has received any sampling results that were done by DER or EPA. He stated that the residences are still concerned that the houses may contain contamination from the Clearview dump. He stated that there was 4 to 6 feet of water in the properties.

Mr. Smalls stated that he would attempt to find the records of the Hedgerow Residence association for EPA to review.
